## About Facundo

Backend Developer proficient in **Python**, **Django** and **JavaScript**. With in-depth knowledge of databases such as **MySQL** and **PostgreSQL**, I also have expertise in frontend frameworks like **Next.js** and **React**. My focus is on developing robust and scalable solutions, ensuring efficient and reliable backend systems.

## Skills

- Python
- Django
- Javascript
- React
- Next.js
- MySQL
- PostgreSQL
- Docker
- git

## Experience

### Intern Student

Jul 2024 - Sep 2024

#### Fuzzy Fish

Developed a comprehensive management platform for Non-Profit Organizations named **Vaid**, as part of a final school project. Worked with a team to leverage **AI** in streamlining human resources management and recruitment, events and activities management, resource allocation and other operation management.

### Backend Developer

Aug 2024 - Present

#### Glossare

**Backend** developer with **Python** on an **AI-powered** automated platform that digitizes, interprets, and compares material and labor quotations, generating the most convenient comparison and purchase order.

## Education

### Programming Technician

#### Salesian Technical Institute Villada

I am a Programming Technician who studied at the Salesian Technical Institute Villada. During my time there, I gained expertise in Python, Javascript, Java, database management, object-oriented programming, and more.
